EDUCATION

University of Toronto **Sept. 2025 - June 2030 (expected)**
Bachelor of Applied Science, Mechanical Engineering + PEY Co-op *Toronto, ON*
Relevant Courses: Thermodynamics, Programming, Mechanical Design, Material Science, Fluid Dynamics, Manufacturing

UNIVERSITY / PERSONAL PROJECTS

NeuronMove **Sept. 2025 - Present**
NeurotechUofT Hardware Subsystem Member *Toronto, ON*
- Co-developed a closed-loop wearable robotic device utilizing real-time tremor suppression with **20+ mechanical components**, integrating machine-learning algorithms and motion assistance for patients with Parkinson's disease.
- Compiled research for mechanical components (i.e. **Motors, linear actuators, accelerometer**) and co-designed an exoskeleton using **SolidWorks** opting for a lightweight, compact model for ease in daily use.

Gearbox Learning Platform **Sept. 2026 – Present**
University of Toronto Mechanical Engineering Design *Toronto, ON*
- Designed and modelled a simplified **manual transmission gearbox** using **SolidWorks,** incorporating **3 gear ratios, a dog clutch, a friction clutch and shafts** to demonstrate gear engagement, power transmission, and speed/torque variation.

StealthComm – Discrete Communication Device **May 2026 – July 2026**
Personal Project *Toronto, ON*
- Created a **Python Morse Code script** for real-time encryption/decryption and transmission of messages through a **remote terminal**, featuring tuned **timing thresholds** to improve accuracy across variable user press patterns.
- Designed and prototyped a **Raspberry Pi** based handheld communication device, integrating buttons, LED indicators, and **GPIO hardware** into a functional, intuitive portable system with supporting user documentation.

AuricleSync Client Design Project **Jan. 2026 – May 2026**
University of Toronto Engineering Strategies and Practice II *Mississauga, ON*
- Co-developed a design proposal to improve audio clarity, accuracy and synchronization for stage performers through site visits using **audio testing** such as frequency-response, SPL testing and room-acoustics analysis while conducting research into **minimizing destructive wave** interference and optimizing audio system positioning and output.
- Prepared **3 alternative design solutions**, implementing **7+ idea generation methods** to produce **over 75 ideas**, to pitch to our client supported by drawings, stakeholders, environment considerations and tradeoffs.

Hand Crank Generator **July 2024 – July 2025**
Personal Project *Mississauga, ON*
- Designed and implemented a **13-component circuit** to deliver a **stable 5V output** for a portable phone charger using a **Nema-17 stepper motor** for mechanical input and enclosed in a 3D printed casing developed in **Autodesk Inventor**.
- Applied circuit design principles using **full-bridge rectifiers**, **regulators,** and **capacitors** to stabilize electrical output.

WORK EXPERIENCE

Classic Tile Contractors Limited **May 2026 – Aug. 2026**
Jr. Project Coordinator *Burlington, ON*
- Assisted in the coordination of **3+ construction projects** exceeding **$5 million** in value, by performing take-offs and **material quantity tracking** in **Excel** while drafting **purchase orders** and **delivery schedules** for material.
- Created and **submitted shop drawings for approval using AutoCAD** with exact tiling layouts, materials, and important annotations to be executed on-site by installers.
- Communicated with suppliers to confirm orders/material stock and **observed on-site operations** to track progress.

LEADERSHIP

Our Lady of Mount Carmel C.S.S. Student Council **Sept. 2023 – June 2025**
Vice-President (2024-2025) and Student Senate (2023-2024) *Mississauga, ON*
- Represented over **1,700 students** at **40+ weekly meetings**, addressing student needs locally and across Dufferin-Peel.
- Ran **10+ school events** and **board initiatives** and wrote **10+ monthly reports** about school activities/concerns.

AWARDS AND ACHIEVEMENTS

- 2025 Governor General's Bronze Academic Medal for Highest Academic Average in Grades 11 and 12
- 2025 Schulich Leader Scholarship Nominee – for demonstrating an entrepreneurial mindset and academic excellence.

SKILLS

- **Technical Skills:** SolidWorks + Simulation, Autodesk Inventor, AutoCAD, LabView, Geometric Dimensioning and Tolerancing, Python, MATLAB, ArchiCAD, Circuitry, Prototyping, MS Office, Slack, Notion, GitHub, Minitab
- **Certificates:** SolidWorks: Simulation for Finite Element Analysis, Certified SolidWorks Associate (W.I.P.), WHMIS
